

iOS and web developer at a cutting-edge Mobile Startup

Trolion is leading the development of next-generation of mobile marketing platform on various smart phone & web devices. Our LBS (Location Based Services) App involves high-tech Social/Local/Mobile Technologies.

If you are someone who is always dreaming of creating the next big thing or if you are someone who wants to be doing what no one else is doing, we love to talk to you. We are a highly-motivated team that values camaraderie and technical innovation. We are looking for an enthusiastic and talented intern to support our iOS development team. Our LBS (Location Based Services) App involves high-tech Social/Local/Mobile Technologies.

.: Who You Are:.

- Love to take on development challenges.
- Ability to communicate with both technical and marketing teams
- Ability to work independently and bring a passion to leave a mark on our products
- Strong multi-tasker
- Passionate about delivering aesthetic user centric interfaces for mobile apps
- Have experience working with a fast-paced start-up team

.: What you'll do

- Work closely with project manager, engineers, existing UI/UX designer and other team members
- Help translate wire frames and images from design document to Xcode project files that demonstrate advanced UI behaviors and data connections.
- Integrate social media and location services, and interactive content through third-party API
- Help translate wire frames and images from design document to HTML/CSS/PHP web pages

.: What you'll need

- 2+ years of experience developing dynamic, highly interactive user interfaces(UI)

for web/mobile applications.

- Experience working with iOS and/or Android
- Bachelor's degree in computer science, software engineering, web development, or other related fields is preferred.
- Intermediate skills in Adobe Photoshop and/or Fireworks for producing and optimizing graphics for the Web.
- Knowledge of one or more object-oriented programming languages or application frameworks such as Java, JSP, Objective C
- Experience with HTML, CSS, JavaScript and/or Flash is a plus

.: Company Description

Trolion is a well-funded, fast-growing Location Based Services start-up in the Los Angeles Area. We provide a unique marketing platform that empowers merchants to reach receptive customers in real time, and implement dynamic and target marketing campaigns. Trolion already has a rapidly growing network of merchants and potential clients ready to utilize our value added marketing solutions.
